

Tarpaflex Ltd

2016/17 Product Brochure

Welcome

Welcome to the current Tarpaflex brochure which has comprehensive details on the widest range of ready made tarpaulins available in the UK. We are an established importer of tarpaulins and over the last 25 years we have built up an unrivalled choice of 16 different tarpaulin specifications in materials such as polyethylene (PE), PVC and cotton canvas. But we don't stop there, we also offer an impressive array of dust sheets, debris and shade netting, polypropylene rope, storage shelters and bungee/shock cord. To complement these products don't forget to check out our accessories such as repair tape, eyelets, sand bags & one tonne builders bags.

Our large stock holding caters for all our customers' needs from single parcels to pallet and container loads. We are determined to provide competitive prices and strive to offer the high levels of service you expect from a family owned business.

We are committed to sourcing the best available products and will continue to work hard adding new products to our range, as well as identifying improvements to existing products. This can be highlighted by now offering UV warranties on our higher specification tarpaulins as well as finished sizes, please see our product pages for further information. We believe in a 'can-do' attitude so please contact us if you have a requirement or question relating to our product range and we will do our best to help you.

We hope to be of service to you in the near future.

General Information

Delivery

We can arrange to deliver goods to you, alternatively you can collect from our warehouse in Devon. We currently use reputable carriers via a nationwide network. Our parcel traffic is carried by DPD, UK Mail and DX while larger orders are sent on a nationwide pallet network, and some of our very light items are sent by Royal Mail. Please refer to your current price list for minimum order values for free delivery. All free deliveries, please allow 3-5 working days for delivery. Premium next day, Saturday and timed deliveries are available, please refer to our current delivery price list for available services and prices. For cut off times please see below. Due to surcharges incurred by our carriers, extra delivery charges may apply to all offshore islands, Northern Ireland and the Highlands of Scotland (deliveries may take longer to remote areas). Please enquire for current charges.

All our carriers require a signature on delivery and it is the recipient's responsibility to only sign for the number of parcels or pallets received. Goods should be inspected on receipt and notification must be given within 48 hours of any shortage or defect. If nobody is in at the time of delivery then the goods will not be left without prior consent. Delivery instructions will be passed on, but any goods requested to be left without a signature are the customer's sole responsibility.

General delivery times are 8.30am to 5.30pm Monday to Friday. However some couriers do operate outside of these times, especially during busy periods like Christmas. Parcels sent with DPD, UK Mail and DX will have a text and/or e-mail sent to pre-advise of expected delivery day.

If our carriers cannot successfully deliver the goods to you, then a card will be left. If after 1 further unsuccessful attempt they still cannot deliver, the goods may then be returned to us and a return charge may be levied. Requests for re-delivery or to an address different to that previously advised, will be charged full delivery rates. Any special delivery requirements or restrictions must be advised at the time of ordering. We do not despatch over weekends or over Bank Holidays. Any time or date named by Tarpaflex for delivery is given and intended as an estimate only and offered in good faith. As we use 3rd party carriers Tarpaflex shall not be held liable for any delays or non delivery of the products ordered. Although over 99% of deliveries arrive on time, we recommend no work is undertaken until the materials arrive. We also deliver to Europe – please contact us for further information and rates.

Cut Off Time

Our cut off time for next day deliveries is 4pm for despatch via our parcel couriers. For pallet deliveries required on a next day service the cut off time is 2pm. Our standard delivery service is 3-5 working days from receipt of order. Any standard orders received after 4pm will be considered as being received the following working day. For example an order received after 4pm on Friday afternoon will be considered as a Monday order. If we can despatch sooner we will do so. For next day orders after our cut off time please call our sales team who will do their best to accommodate you.

Warranty Info

All of our products are guaranteed to be free from defect at the time of purchase. We do not warrant beyond first use due to the many and varied applications our products can be put to. Should you receive any faulty goods, we must be advised upon receipt of the order and no later than 14 days after delivery. We will request an email photograph of the defect. Should your order be deemed to be a genuine manufacturing fault, we will arrange for a replacement to be sent to you. One of our sales team will notify you if the item needs to be returned; this will be arranged by us, at our expense. This warranty is only applicable to new, unused products in their original packaging. It does not cover products that have been used and have been damaged due to improper installation, wear & tear, and any damage caused by strong winds, storms, hurricanes, snow, fire or any further act of nature. We strongly advise proper installation of your purchase. We will not accept responsibility for pulled eyelets as a result of product wear and tear.

We hope you are completely satisfied with your purchase. However, if you are not satisfied or change your mind, you may return the item within 14 calendar days from the date of order for a refund of the purchase price. The return freight is the responsibility of the customer. For trade customers a 20% restocking fee may be levied. All returned goods must be received in a new and unused condition together with any relevant paperwork. We expect the returned items to be in their original poly bag and not subject to scratches, blemishes or trace of usage. Providing your return meets the above criteria a refund or exchange will be organised.

We currently offer a limited 1 year warranty on our range of shelters from date of purchase. Normal wear and tear is not covered by the warranty, please see our website for further details.

UV Warranty

We offer a limited warranty against UV on a number of our heavy weight tarpaulins, whereby those products are warranted to be UV stable in UK conditions for a specified period from date of purchase. The warranty guarantees that the product will not fail due to exposure to UV. If that product should fail before the specified time our sole remedy will be to replace the product, we will not have other or greater liability for defects in the product, nor will Tarpaflex have any liability for incidental, special or consequential damages of any kind. This warranty applies in relation to UV issues only. Full details can be found on our website.

Our normal working hours are 8.45am to 6pm Monday to Friday.

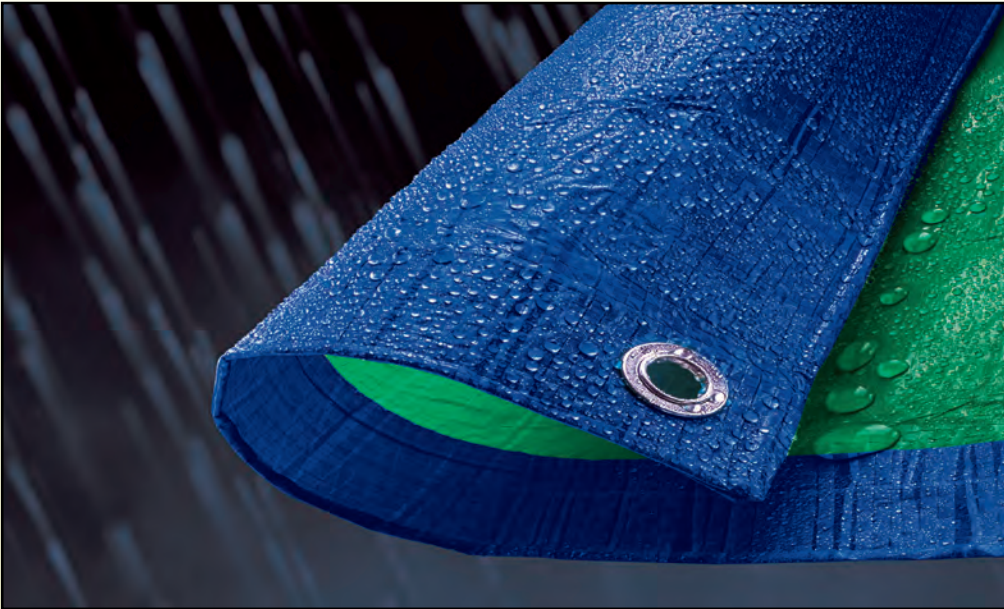

All specifications are liable to change without further notice. Please check our website for current stock listings.

Budget 70gsm Tarpaulins

Ref	Cut Size Metres	Imperial (Approx)	Pack Q'ty	Colours
T00-70	1.2 X 1.8	4' X 6'	40pcs	Blue/Green
T1-70	1.8 X 2.4	6' X 8'	20pcs	Blue/Green
T2-70	2.7 X 3.5	9' X 12'	10pcs	Blue/Green
T4-70	3.5 X 5.4	12' X 18'	10pcs	Blue/Green
T8-70	5.4 X 7.0	18' X 23'	3pcs	Blue/Green

Tips & Advice : To get maximum life span from your tarpaulin it is always recommended to securely fasten it. Additional eyelets are available on our Accessories page (P25)

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colour Available

Blue and Green

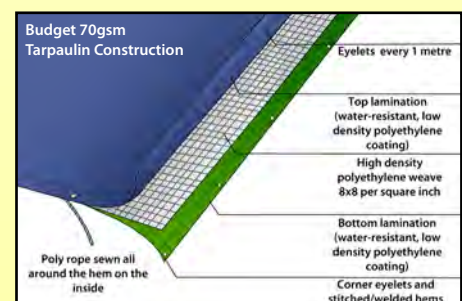

Key Features:

The starting point for your low cost covering requirements, our budget tarpaulins are waterproof and come complete with eyelets spaced every 1 metre.

Great for temporary projects where cost is a priority over longevity, our budget tarps come in 5 popular sizes.

Widely used on construction sites these lightweight covers are rotproof, shrinkproof and easy to handle. Dual coloured, Blue on one side and Green the other.

Colours Available

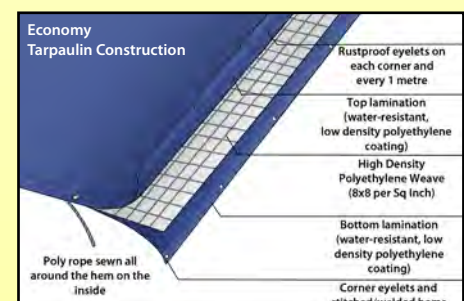

Key Features:

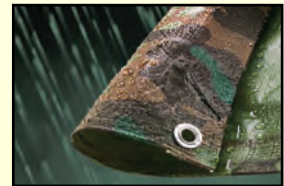

Tarpaflex offers a comprehensive selection of standard grade tarpaulins which are waterproof and have aluminium eyelets at 1 metre intervals in rope reinforced hems. Recommended as a temporary waterproof cover with hundreds of different applications each tarpaulin is lightweight, easy to handle, rotproof, shrinkproof, UV protected for longer life and flexible to minus 20 celcius. The main colours available are green or blue and selected sizes are available in white, all subject to availability. Each tarpaulin is flat packed in a poly bag with a descriptive colour insert with a bar code. For customers purchasing in bulk & requiring their own insert please speak to our sales team for more info – minimum order quantities and lead times apply. It is recommended during inclement weather conditions that all tarpaulins are securely tied down to reduce wear and tear.

For additional eyelets and fixing aids please see our accessories on page 29 & 30.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Camouflage 80gsm Tarpaulins

Ref	Cut Size Metres	Imperial (Approx)	Pack Q'ty	Colour
CAMT00	1.2 X 1.8	4' X 6'	40pcs	Camouflage/Olive Green
CAMT1	1.8 X 2.4	6' X 8'	20pcs	Camouflage/Olive Green
CAMT1A	2.4 X 3.0	8' X 10'	20pcs	Camouflage/Olive Green
CAMT2	2.7 X 3.5	9' X 12'	10pcs	Camouflage/Olive Green
CAMT4	3.5 X 5.4	12' X 18'	10pcs	Camouflage/Olive Green
CAMT7	4.5 X 6.0	15' X 20'	5pcs	Camouflage/Olive Green
CAMT8	5.4 X 7.0	18' X 23'	3pcs	Camouflage/Olive Green
CAMT12	9.0 X 14.0	29' X 46'	1pc	Camouflage/Olive Green

Please note that we cannot guarantee the continuity of the Camo print, however we will endeavour to have the same Camo print for all of our imports. Some fading of print can occur on hems and seams.

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colour Available

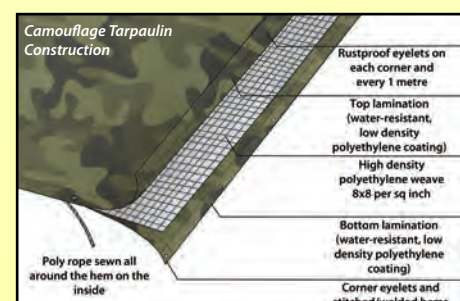

Camo and Olive Green

Key Features:

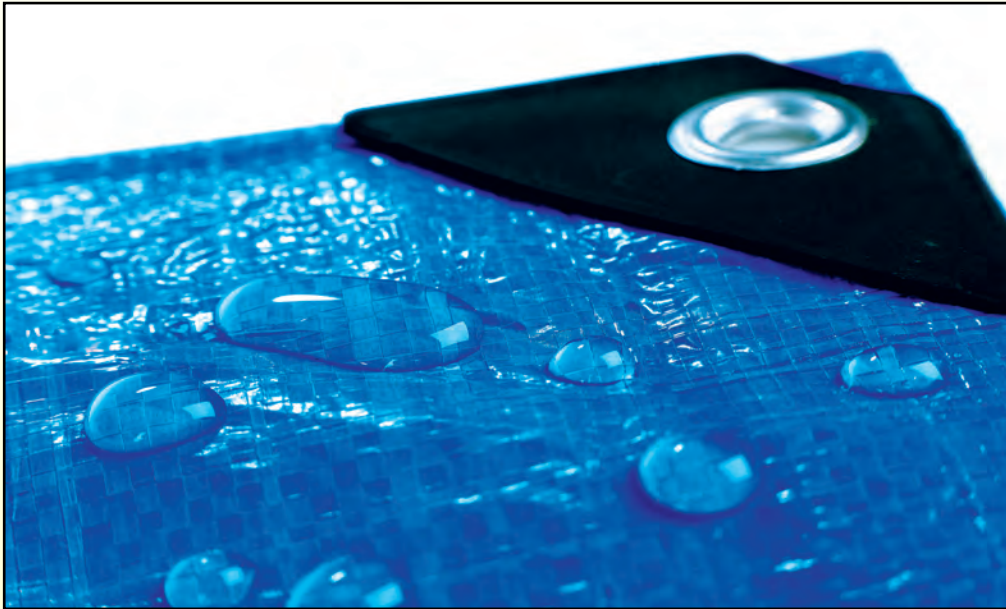

Our Army Camouflage Tarpaulins have camouflage printing on one side of the tarpaulin and are olive green on the other. The camo' tarps are made to the same specification as our range of economy tarpaulins and are widely used for outdoor pursuits including camping, hunting, fishing & paintballing. Also perfect for concealing items in a field or garden, our camo' tarps blend seamlessly into the countryside.

If the Army Camouflage print is not required then the tarp can be flipped over to the Olive Green side so you can have the benefit of 2 colour options.

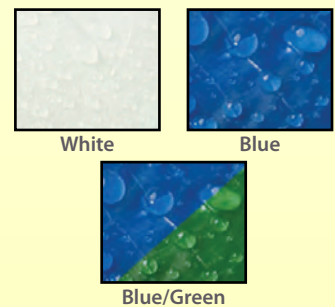

Standard 110gsm PE Tarpaulins

Ref	Cut Size Metres	Imperial (Approx)	Pack Q'ty	Colours Available

ROLL	1.8 X 100	6' X 328'	1pc	Blue

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colours Available

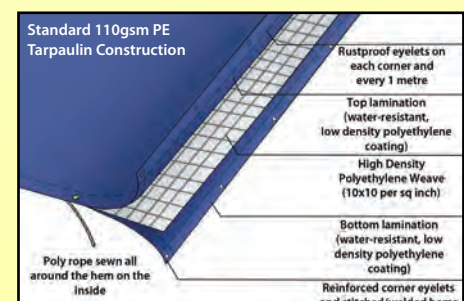

Key Features:

In the ongoing quest to cater for as many customers and applications as possible, we have broadened our already extensive range of economy polyethylene sheets by introducing a White and Blue 110gsm tarpaulin. The Standard 110gsm tarps are a step-up from our 80gsm base range, with a closer 10 x 10 weave count and corner patches on all 4 corners.

These covers are lightweight and easy to handle as well as being great value for money. They are perfect for multiple applications, from temporary covering solutions to such uses as decorating and DIY, groundsheets, building site covers and garden tarps. The white tarps are also effective in situations where light penetration is required.

Also included in the 110gsm range is the 1.8m x 100m roll which is popular for tarpaulin fabricators and packaging requirements.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Medium Weight 140gsm Tarpaulins

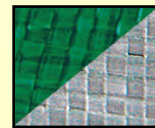

Ref	Cut Size Metres	Imperial (Approx)	Pack Q'ty	Colours Available
GST1	2.0 X 3.0	7' X 10'	10pcs	Green/Silver
GST2	3.0 X 3.0	10' X 10'	10pcs	Green/Silver
GST4	3.5 X 5.5	12' X 18'	5pcs	Green/Silver
GST7	7.0 X 7.0	23' X 23'	3pcs	Green/Silver
GST8	5.5 X 7.0	18' X 23'	3pcs	Green/Silver
GST15	6.0 X 10.0	20' X 33'	1pc	Green/Silver
GST16	8.0 X 12.0	26' X 39'	1pc	Green/Silver
GST17	11.0 X 13.0	36' X 43'	1pc	Green/Silver

Tips & Advice: Our tarpaulins are popular as a temporary cover for hay and straw. Please be aware that plastic covers are not breathable therefore condensation can build up under the cover when hay and straw sweats. Allows as much air to circulate within the haystack to minimise condensation issues.

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colour Available

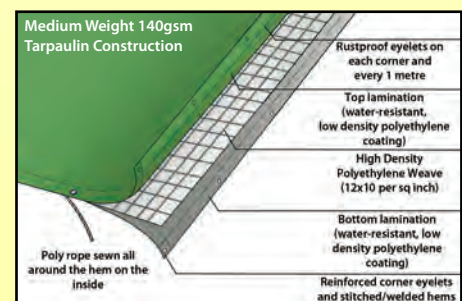

Green/Silver

Key Features:

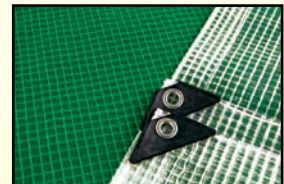

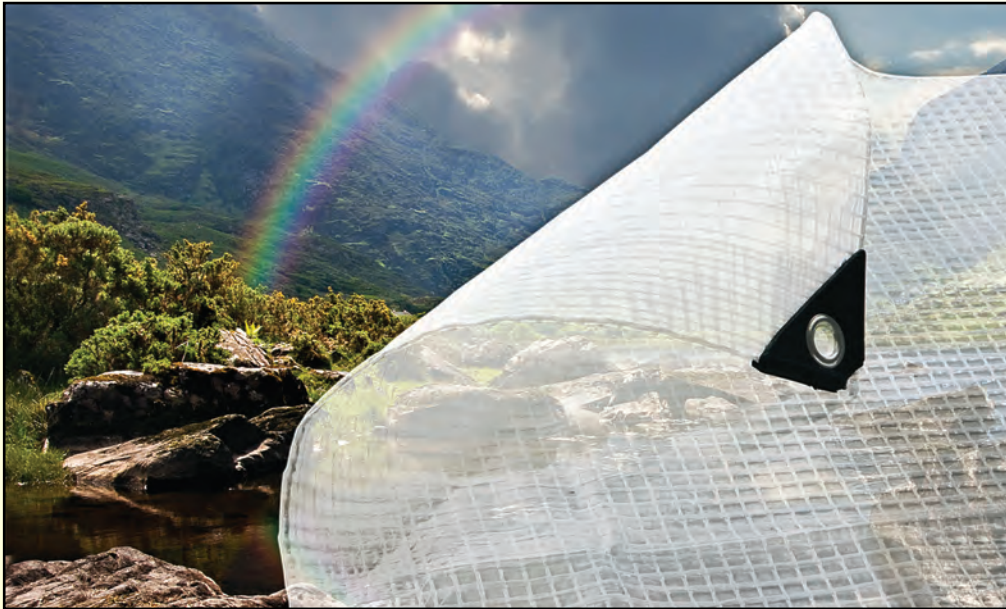

The reversible green/silver range is what we deem to be a medium grade woven polyethylene tarpaulin with a weight of approximately 140gsm and a 12 x 10 mesh. Aluminium eyelets are at 1 metre intervals in rope reinforced hems. Approximately twice the weight of an economy tarpaulin they are widely used in agriculture, camping, home, garden and construction. These versatile waterproof tarps are UV protected and the small additional expense over an economy tarp will provide you with a heavier tarp which is more suited to prolonged usage. These tarps are more akin to the first polyethylene tarps introduced to the UK market over 40 years ago.

To maximise the lifespan of your cover additional eyelets are highly recommended and to strengthen any stress points try some tarp tape - please see accessories on page 29 & 30.

Mono Cover 170gsm Tarpaulins

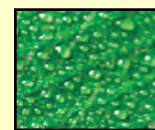

Ref	Cut Size Metres	Imperial (Approx)	Pack Q'ty	Colours Available
MT1	3 X 4	10' X 13'	5pcs	Green or Clear
MT2	4 X 5	13' X 16'	3pcs	Green or Clear
MT3	4 X 6	13' X 20'	3pcs	Green or Clear
MT3A	4 X 8	13' X 26'	2pcs	Green or Clear
MT4	4 X 10	13' X 33'	2pcs	Green or Clear
MT5	8 X 10	26' X 33'	1pc	Green or Clear
MT6	10 X 17	33' X 56'	1pc	Green or Clear

Please add /C (for Clear) to the end of the Ref code.

•For Example a 3mx4m in Green would be MT1 and a 3m x 4m in Clear would be MT1/C

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colours Available

Green

Clear

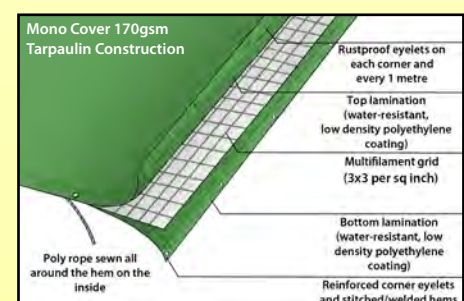

Key Features:

The Mono Cover is a medium grade 170gsm tarpaulin that is a popular step up in grade from an economy tarpaulin. Made from a 3 x 3 per square inch multifilament grid which is then laminated with low density polyethylene, the Mono Cover comes in a choice of green or clear.

The clear version is especially popular for projects where maximum light is required, as it allows approx' 70% light transmission. As a result they are widely used in boat yards, on building sites and even as a waterproof cover for rabbit hutches, kennels and chicken coops.

Aluminium eyelets are spaced at 1 metre intervals and all 4 corner eyelets have corner patches. Each tarpaulin is packed in a poly bag with a small sample swatch attached.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Striped 170gsm Tarpaulins

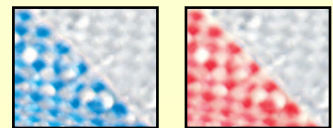

Ref	Cut Size Metres	Imperial (Approx)	Pack Q'ty	Colours Available

Green/White

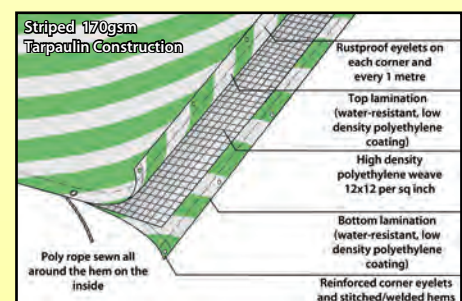

Key Features:

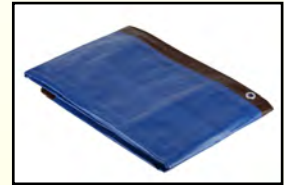

Tarpaflex offers a comprehensive range of striped market stall tarpaulins which are manufactured to a minimum 12 x 12 weave and 170gsm. Aluminium eyelets are spaced at 1 metre intervals and all 4 corner eyelets have plastic corner reinforcements. Commonly used as either roof covers or side sheets for market stalls, this popular range is available in 8 sizes and in 3 different colour combinations – Green & White Striped, Blue & White Striped and Red & White Striped.

These high quality tarpaulins have a UV inhibitor and are fade resistant.

Each tarpaulin is flat packed in a poly bag with a colour insert. See our accessories page for ball bungees & additional eyelets.

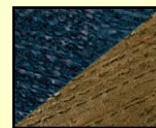

Brown Blue 185gsm PE Tarpaulins

Colour Available

Brown/blue

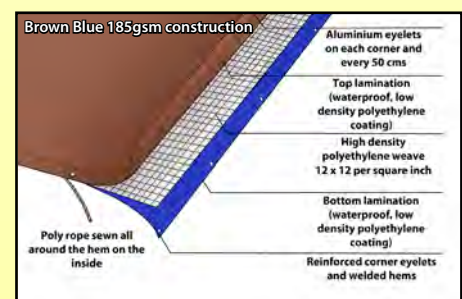

Key Features:

Introduced in 2014 as a trial, the 185gsm range of tarps have now become a firm fixture in our constantly expanding range of tarpaulins. The starting point for our heavy weight covers the woven 185gsm material is proving to be a hit as it offers a noticeable increase in quality over economy grade tarpaulins and provides great value for money.

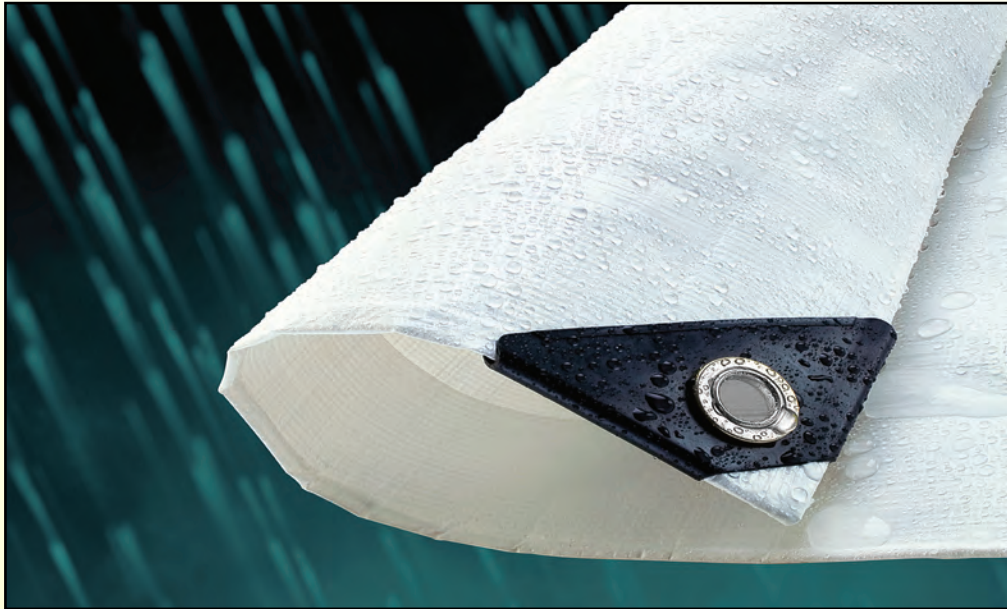

Aluminium eyelets are spaced at 50cm intervals and all four corner eyelets have corner reinforcements. With an approximate 12 x 12 mesh count, UV stabilised coating and a versatile dual brown / blue colouring they blend into most outdoor settings. These durable tarps are popular as camping groundsheets, garden furniture covers, wood stack covers, timber covers, roofing tarps and much more.

Each tarpaulin is packed in a poly bag with a sample swatch attached to the outside of the bag.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to the life expectancy of our products. Please see our website for more details.

RHDT10	12.0 X 25.0	39' X 80'	1pc	Super Red

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process.
It is the responsibility of the end user to determine the size and suitability of the product for their application.
We will endeavour to offer the riveted corner reinforcement on all supplies but this may be subject to change without further notice.

Colours Available

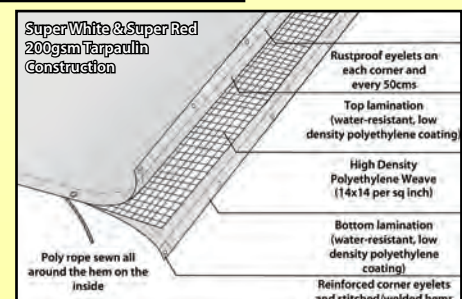

Key Features:

The Super White and Super Red range of 200gsm tarpaulins are made to approx 14 x 14 mesh count per sq inch. Strong yet still light enough to handle these hardy waterproof covers have eyelets at approximately 50cm intervals on all four edges and corner patches on all four corners.

Used widely as a market stall cover, garden canopy, boat cover, industrial tarp, roofing cover, groundsheet for marquees and a host of other applications.

These tarpaulins have an inbuilt UV inhibitor to ensure the material does not prematurely degrade due to the harmful effects of the sun. It is also flexible in sub zero conditions.

Flame Retardant 200gsm Tarpaulins

Ref	Size Metres	Imperial (Approx)	Pack Q'ty	Colour
FRT0	1.8 X 2.4	6' X 8'	15pcs	White
FRT1	2.7 X 3.5	9' X 12'	10pcs	White
FRT2	3.6 X 6.0	12' X 20'	5pcs	White
FRT3	3.0 X 7.5	10' X 25'	5pcs	White
FRT4	4.5 X 6.0	15' X 20'	3pcs	White
FRT5	5.5 X 7.0	18' X 23'	3pcs	White
FRT6	7.0 X 9.0	23' X 29'	1pc	White
FRT7	6.0 X 12.0	20' X 40'	1pc	White
FRT8	7.0 X 11.0	23' X 36'	1pc	White
FRT9	9.0 X 9.0	30' X 30'	1pc	White
FRT10	9.0 X 15.0	30' X 50'	1pc	White

All sizes are finished sizes & imperial equivalents are approximate. The finished size has allowed for hems and seams so expect there to be a minimal manufacturing tolerance however this should be approximately 5cms on either dimension. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colour Available

White

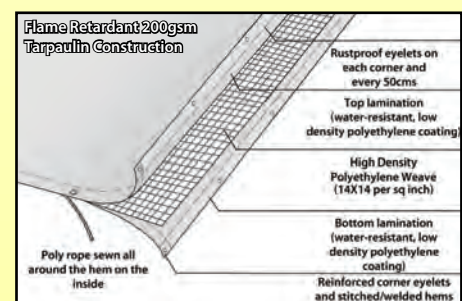

Key Features:

Our Flame Retardant White Tarpaulins are manufactured to the Californian Standard CPAI 84 Section 6 and offer the discerning customer a strong, waterproof cover with a high standard flame retardancy. The flame retardant nature of this cover is intended to increase the length of time it takes for the material to catch light however the fabric will burn if left in continuous contact with any flame source.

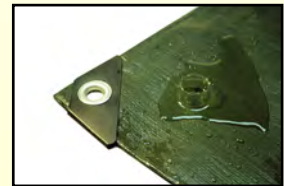

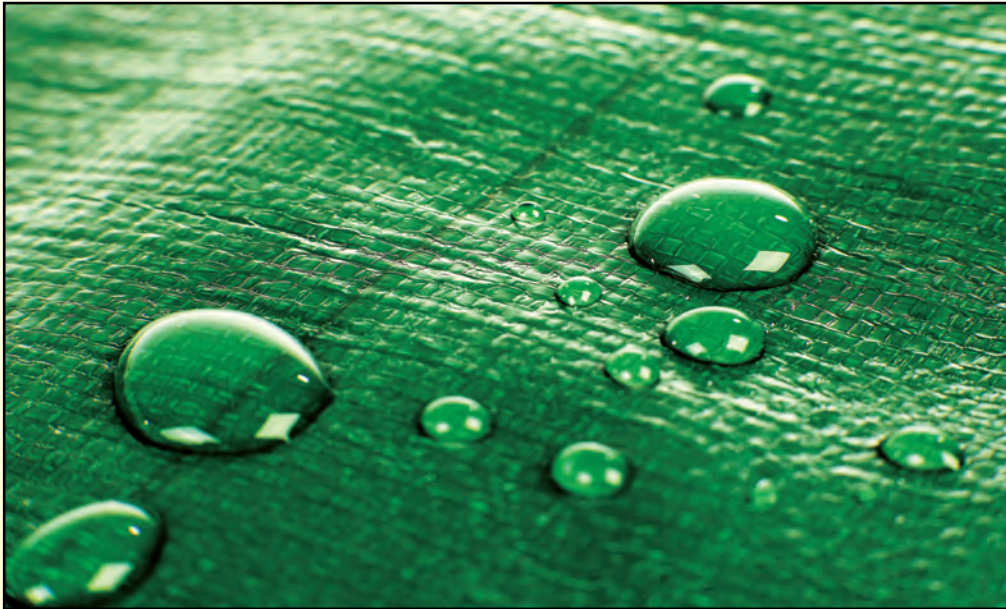

With health and safety laws becoming more stringent, the Flame Retardant Tarpaulins are especially suited to the building, construction and welding trade, but can also be useful for recreational and domestic use.

They are a great upgrade to your market stall tarpaulin. Each tarpaulin is supplied with a flame retardancy declaration stitched to each tarpaulin.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

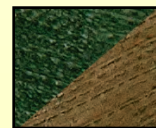

Heavy Weight 250gsm PE Tarpaulins

All sizes are finished sizes & imperial equivalents are approximate. The 'finished size' has allowed for hems and seams so expect there to be a minimal manufacturing tolerance however this should be no more than approximately 5cms on either dimension. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colour Available

Green/Brown

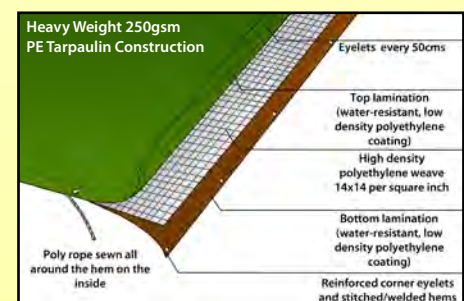

Key Features:

Our popular range of green / brown tarpaulins are among the heaviest weight polyethylene tarps we supply, with an approx weight of 250 grams per square metre. Nonetheless these waterproof tarps remain easy to handle, and provide an economical alternative to canvas or PVC. Now supplied in finished sizes and with a limited 1 year UV warranty.

The green / brown heavy weight tarpaulins have a tight 14x14 per square inch weave count, 3% UV inhibitor, corner patches and 12mm aluminium eyelets at 50cms intervals.

With 11 sizes to choose from these covers are one of our most favoured product ranges which strike a great balance between cost and extra durability. A hardy tarpaulin which will blend in well with any outdoor setting, the colour scheme makes this range the ideal outdoor cover. Each tarpaulin is packed in a poly bag with a sample swatch.

Heavy Weight 270gsm PE Tarpaulins

Ref	Size Metres	Imperial (Approx)	Pack Q'ty	Colour
STP1	1.2 X 1.8	4' X 6'	20pcs	Black/Silver
STP2	3.0 X 3.6	10' X 12'	5pcs	Black/Silver
STP3	4.0 X 5.0	13' X 16'	3pcs	Black/Silver
STP4	4.0 X 10.0	13' X 33'	2pcs	Black/Silver
STP5	8.0 X 8.0	26' X 26'	1pc	Black/Silver
STP6	5.0 X 20.0	16' X 65'	1pc	Black/Silver
STP7	9.1 X 12.2	30' X 39'	1pc	Black/Silver
STP8	12.0 X 15.0	39' X 48'	1pc	Black/Silver

Tips & Advice : The large brass eyelets are stronger than standard aluminium or plastic eyelets and will reduce the likelihood of eyelets pulling under tension. However, it is recommended not to put excessive force on any eyelet as this may result in the eyelet popping out and potentially ripping the tarpaulin. If tension is likely to be applied to the eyelets we suggest fixing additional eyelets to help spread the strain.

All sizes are finished sizes & imperial equivalents are approximate. The 'finished size' has allowed for hems and seams so expect there to be only a minimal manufacturing tolerance which should be no more than approximately 5cms on either dimension. It is the responsibility of the end user to determine the size and suitability of the product for their application. We will endeavour to offer the riveted corner reinforcement and brass eyelets on all supplies but this may be subject to change without further notice.

Colour Available

Black/Silver

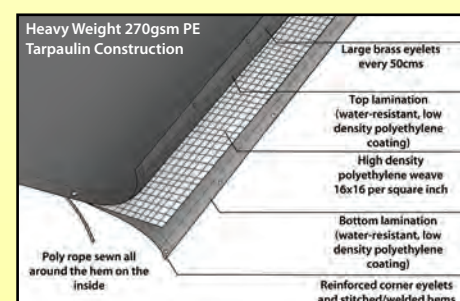

Key Features:

Since the introduction of this range in 2009 the black / silver tarps have proven to be extremely popular as a premium grade polyethylene tarpaulin. This beefy range of heavy weight covers boasts a tight 16 x 16 weave count and an overall material weight of 270 gsm. The 270gsm pe material is complemented by chunky corner reinforcements riveted to all 4 corners and solid 20mm diameter rust free brass eyelets spaced every 50cm. The original 270gsm black/silver tarp on the market has it's imitators but can't be surpassed.

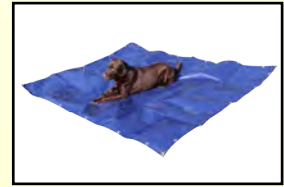

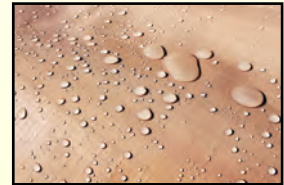

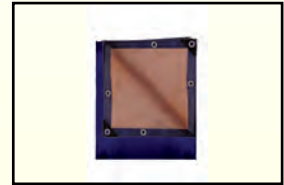

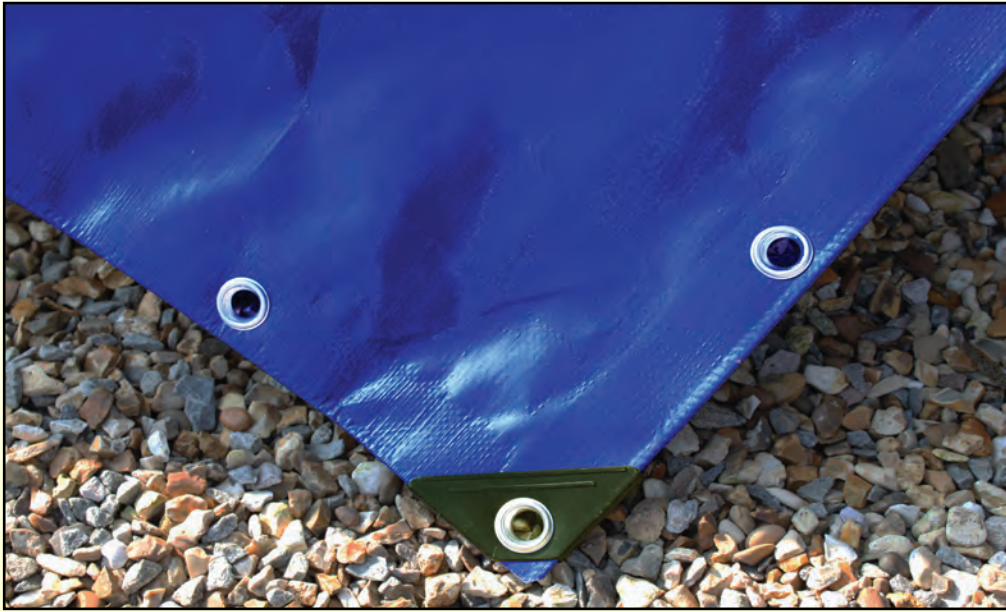

These tarps are popular in industry, construction and marine as well as a popular back drop on music or film sets.

In order to offer our customers the best possible product on the market our black /silver 270gsm tarps are now supplied in finished sizes and come complete with a limited 18 month UV warranty.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. This tarpaulin comes with a limited 18 month UV warranty. Please visit our website or the back of this brochure for more details.

Extra Heavy Weight 350gsm PE Tarpaulins

Ref	Size Metres	Imperial (Approx)	Pack Q'ty	Colour
BHD1	2.0 X 2.5	6' X 8'	8pcs	Blue/Beige
BHD2	2.0 X 6.0	6' X 20'	5pcs	Blue/Beige
BHD3	5.0 X 7.5	16' X 24'	2pcs	Blue/Beige
BHD4	5.0 X 11.0	16' X 36'	1pc	Blue/Beige
BHD5	6.0 X 13.0	20' X 42'	1pc	Blue/Beige
BHD6	9.0 X 16.0	29' X 52'	1pc	Blue/Beige
BHD7	13.0 X 17.0	42' X 55'	1pc	Blue/Beige

Tips & Advice : Please note some of the larger sizes can be extremely heavy. For example the 13m x 17m tarp has an overall weight of approximately 77kgs so for lifting purposes this will be a 2 man job.

All sizes are finished sizes & imperial equivalents are approximate. The 'finished size' has allowed for hems and seams so expect there to be a minimal manufacturing tolerance however this should be no more than approximately 5cms on either dimension. It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colour Available

Blue/Beige

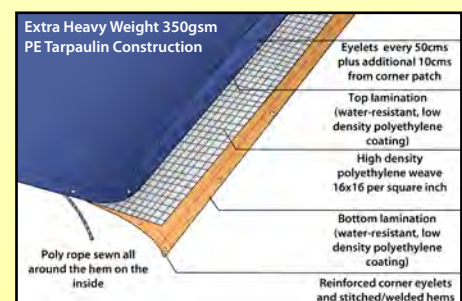

Key Features:

Woven polyethylene tarps can't get much heavier duty than this. The ultimate in poly tarps this behemoth of a cover is made from sturdy PE material that is difficult to surpass. These robust tarps challenge most heavier grade PVC tarps for durability and weighing in at a hefty 350 grams per square metre they are built to last. With additional UV inhibitors to stop premature UV degradation they are covered by a limited 2 year UV warranty

Want to feel the difference ? Find out the quality of a 350gsm tarp for yourself by asking for a free sample swatch.

For the colour conscious this product range is dual coloured, with blue one side and beige the other. Eyelets are spaced at 50cm intervals along the 4 edges. On all 4 corners additional eyelets are spaced 10cm either side of the corner patch.

It is the responsibility of the end user to determine the size and suitability of the product for their application.*

Colour Available

Glass Clear

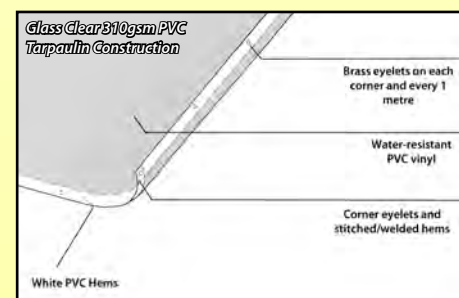

Key Features:

Just as the name suggests, you can see through these tarps as if they were a pane of glass; they are great for projects where maximum light penetration is required. Completely waterproof, rotproof and shrinkproof, they are widely used as side curtains on market stalls, or utilised as a cover over goods during bad weather.

Our Clear PVC tarps can be used to work underneath in the garden or during building work as they do not block out light while keeping the working area dry. Also particularly popular as a cover for animal enclosures such as chicken coops and kennels. These tarps even work well as a water slide!

Made from unsupported PVC each tarp has White PVC reinforced hems accommodating brass eyelets at 1 metre intervals. Please note all sizes in this range are 'finished sizes'.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Heavy Weight 560gsm PVC Tarpaulins

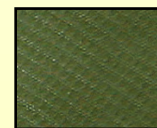

Ref	Size Metres	Imperial (Approx)	Pack Q'ty	Colours Available
PVC0	1.3 X 1.9	4' X 6'	10pcs	Olive Green
PVC1	3 X 3	10' X 10'	5pcs	Olive Green
PVC2	3 X 5	10' X 16'	2pcs	Olive Green

PVC 6	7 X 12	23' X 39'	1pc	Olive Green
PVC 7	10 X 14	33' X 46'	1pc	Olive Green

Tips & Advice : The eyelets on the 3 rivet corner reinforcements are 8mm inside diameter , the brass eyelets in the hem are 20mm diameter.

All sizes are finished sizes & imperial equivalents are approximate. The 'finished size' has allowed for hems and seams during the fabrication process so expect there to be only a minimal manufacturing tolerance, which should be no more than approximately 5cms on either dimension. It is the responsibility of the end user to determine the size and suitability of the product for their application. We will endeavour to offer the riveted reinforcement on all supplies but this may be subject to change without further notice.

Colour Available

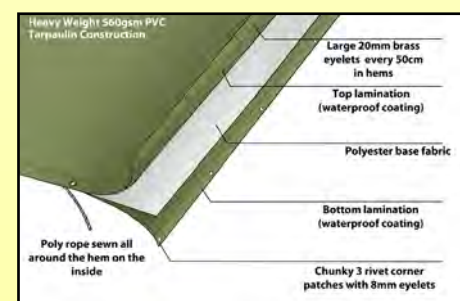

Olive Green

Key Features:

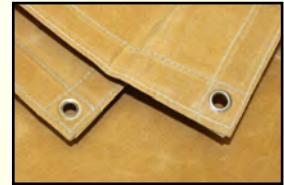

Our heavy weight PVC tarpaulins are currently the heaviest specification plastic tarpaulins we supply. Made from PVC coated polyester to a weight of 560gsm these strong waterproof tarpaulins are made for all seasons. A PVC tarp is flexible in sub zero temperatures, is UV protected complete with a two year UV warranty, rot proof, shrinkproof and durable. Brass eyelets are spaced at 50cm intervals in rope reinforced hems and chunky 3 rivet corner reinforcements are on all 4 corners. Suitable for anything you can possibly need a tarpaulin for, from a groundsheet to a hay stack cover, the PVC range of tarpaulins are available in olive green in 8 pre-fabricated sizes.

The PVC tarps have 20mm inside diameter solid brass eyelets in reinforced hems. Although brass eyelets tend to be stronger than aluminium we make no claim to the strain they can take and additional eyelets are recommended for applications where extra stress is exerted .

Tips & Advice : Please exercise caution as small amounts of wax and dye from the material could rub off and potentially stain items it comes into contact with (e.g. boats). Please be aware that canvas tarpaulins can be liable to slight shrinkage when used in warm and wet climatic conditions.

All sizes are finished sizes & metric equivalents are approximate. The 'finished' size has allowed for hems and seams during the fabrication process so expect there to be a minimal manufacturing tolerance, which should be no more than approximately 2-3 inches on either dimension. Please note canvas tarps can shrink by up to 5%.

Colour Available

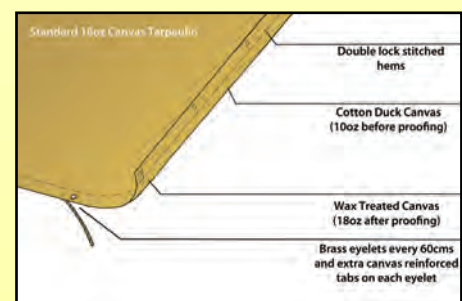

Tan

Key Features:

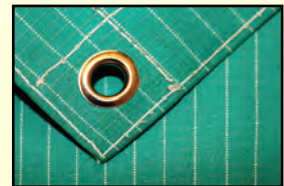

A comprehensive range of traditional style tarpaulins made from cotton duck canvas. The term cotton duck originates from the Dutch word 'doek', meaning linen canvas. Cotton duck canvas is a plain woven fabric which is typically used in situations where a strong and hardy material is needed. Each canvas tarpaulin is then wax processed, has double stitched hems, double stitched seams, brass eyelets at 2ft intervals with strengthening tabs under each eyelet in the stitched hem. Cotton canvas tarpaulins are a popular choice for a traditional heavy weight cover with a rustic appearance. Cotton is also considered as more sustainable and environmentally friendly than their synthetic counterparts and has the added benefit of being breathable allowing any moisture under the cover to evaporate. The larger canvas tarps are widely used as flat bed lorry covers, trailer covers, as well as in marine, agriculture and industry. The smaller tarps are popular as groundsheets. Please note as canvas tarps are breathable we deem them to be water resistant rather than fully waterproof.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

All rip-stop sizes are 'cut sizes' & metric equivalents are approximate. The 'finished size' can be up to 7-12 inches shorter to allow for hems and seams during the fabrication process.
Heavy weight 21oz canvas tarps are finished sizes
It is the responsibility of the end user to determine the size and suitability of the product for their application.

Colours Available

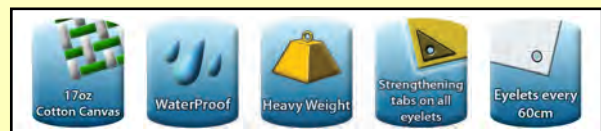

Heavy Weight Green

Ripstop Green

Key Features

Heavy Duty 15oz/21oz

Eleven sizes of heavy weight canvas, for a harder wearing alternative to the standard weight. These tarpaulins are wax processed meaning they resist water. 15oz per square yard material before wax processing, the final weight of 21oz fabric is for premium resistance to abrasion and punctures.

Rip Stop Canvas 15oz/17oz

A Cotton Canvas tarpaulin blended with polyester yarn for superior rip stop properties. Any tears tend to be localised as the polyester yarn stops the tear running. A heavy weight material chemically treated ensuring it is lighter to handle than wax processed canvas tarps.

Tips & Advice : Twill, Calico and Canvas dust sheets are all suitable for machine washing at 30c

All sizes are 'cut sizes' & imperial equivalents are approximate. The 'finished size' can be up to 20-30 cms shorter to allow for hems and seams during the fabrication process. It is the responsibility of the end user to determine the size and suitability of the product for their application.

We supply an extensive range of dust sheets to suit different requirements and budgets. Commonly used to protect furniture and floors when decorating, dust sheets are also used to cover items in storage as well as a host of other uses. All our cotton dust sheets are a cream off white colour, for a pure white colour see the stitch bonded dust sheet.

Here is a brief description of the different types available:

COTTON TWILL – Standard grade dust sheet with a twill woven construction. Widely used for covering furniture and floors. Our most popular dust sheet used by builders and decorators, available in 3 sizes including a stairway dust sheet. Twill dust sheets have a coarse thicker thread when compared to calico dust sheets. Washable and reusable.

COTTON CALICO – the popular cotton calico dust sheet is a finer, softer cotton than cotton twill with a tighter plain weave. Less likely to allow dust to penetrate. Washable and re-usable.

BOLTON TWILL - A heavier grade high density dust sheet, this is a more tightly woven version of our standard Twill dust sheet. More suited to repeated usage the Bolton Twill is professional quality. Washable and reusable.

HEAVY DUTY COTTON CANVAS – Extremely tight weave with a thick thread, the cotton canvas dust sheet is the professional's choice for a prolonged working life. This premium grade dust sheet is for the serious painter or decorator and is washable and reusable.

LAMINATED TWILL – The same as our standard cotton twill dust sheet but with a thin plastic membrane laminated to the underside of the sheet. The plastic layer stops any potential liquid spills or heavy dust from penetrating through the sheet, therefore giving the user peace of mind that any spills will be contained to the sheet.

STITCH BONDED – Lightweight dust sheet made from synthetic fabric, the stitch bonded dust sheet is a good all round dust sheet for many decorating and DIY jobs.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Polypropylene Rope

LR	Hank Lorry Rope	10mm	27m	25pcs
R6REEL	Reel	6mm	500m	1pc

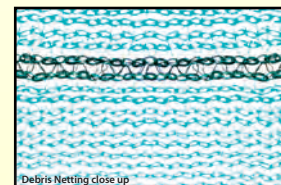

Our polypropylene rope is a general purpose rope with hundreds of uses in the home, garden, agriculture, boating or industry. The range of different rope diameters come in handy 30 metre mini coils, larger 220 metre coils or a popular 27m hank of lorry rope. The 6mm diameter also comes on a plastic reel, in 500m lengths.

Made from hard wearing 3 strand split film polypropylene (pp), this rope is weather resistant, rotproof, flexible and as it doesn't absorb liquid, floats on water. It also has an excellent resistance to chemicals and abrasions.

The uses are endless for pp rope, it is a great all rounder and is commonly used for strapping items down, lashing tarpaulins and cargo, as well as a draw cord for underground cabling, used by telecommunications companies. The economical and versatile 220m rope is widely used in agriculture, industry, building, cabling, transport and marine. The handy 30 metre mini coils are great kept on boats or in your shed/garage for home and garden use. The larger 500 metre reels are a good choice for customers wanting to sell rope by the metre as it is easily spooled off the reel.

Each coil is tightly wrapped with a polythene outer for easy transportation and display.

Debris Netting

Tarpaflex debris netting is made from UV stabilised polyethylene monofilaments which creates an open mesh netting. Primarily used on scaffold systems to keep any rubbish or debris contained on a building site, it improves site safety by reducing the risk of debris or objects falling outside the working area. By aiding the containment of debris, a safer environment is afforded to both workers and the general public. Debris netting can also be used to create a barrier or partition sites during sports or recreational events. It is also extremely popular and widely used as a general netting in gardens, allotments and farms to place over plants, crops or vegetation to help protect produce.

Our core range is manufactured to approximately 70gsm, all our netting has button hole eyelets along the edges and along the middle section to ease the fixing of the netting to scaffolding or other objects. To complement our core range, we have a lighter 50gsm netting, a heavier 100gsm netting and also a flame retardant white debris netting that is manufactured to the US National Fire Protection standard NFPA701.

Scaffold Sheeting

Tarpaflex clear scaffold sheeting provides weather protection on scaffold systems. Made from strong waterproof UV stabilised polyethylene it will help protect workers from wind, rain and the elements. It also helps contain debris and waste, which in turn improves the general working environment. The clear sheeting allows approx 70% light transmission and has 3 bands of reinforced polyethylene webbing with approx 15mm diameter outline holes to aid the fixing of the sheeting to scaffolding. Simply pierce the webbing with toggle ties/shock cords and attach to scaffold poles. Under normal weather conditions it is generally recommended to fix 100 ties per 45 metre roll.

The sheeting can be installed horizontally or vertically. When joining 2 rolls together, overlap the ends of both rolls and push ties through both sheets. Regular inspections should be made to make sure the sheeting is securely fastened.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Sand Bags & One Tonne Bags

Ref	Product	Material	Size Metric	Imperial
SANDP	Sand Bag	Polypropylene	76cm x 33cm	30" x 13"
SANDH	Sand Bag	Jute Hessian	76cm x 33cm	30" x 13"
SANDHR	Sand Bag	Rot-proof hessian	76cm x 33cm	30" x 13"
FIBC1	One tonne bag	Polypropylene	86cm x 86cm x 86cm	33"x33"x33"

One Tonne Bags

Our one tonne bags are a cost effective packaging and transportation product which are also commonly known as FIBCs (Flexible Intermediate Bulk Containers) , builders bags, dumpy bags and bulk bags. They are made from tough woven polypropylene with four stitched handles essential for lifting by forklift, crane or telehandler . Our bags have an open top and flat bottom. The safety factor is 5:1, meaning they are fully certified for a single trip with a load of 1000kgs.

They are a strong and durable multi use product widely used for transporting and storing bulk loads of building materials, aggregate, agricultural products, fertilisers, sand, plastics, foodstuffs and much more. A one tonne bag is also a flexible option for home, garden and business use with plenty of capacity for garden waste and recycling. Easy to clean and fold away when not in use they are also easily recyclable at the end of their lifespan.

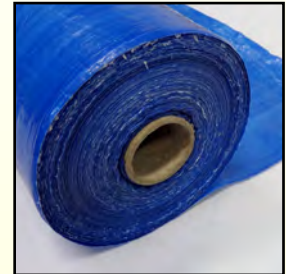

Sand Bags

Sand bags are an increasingly essential product to have in assisting flood prevention. With more instances of flooding, sand bags are becoming a vital product for home and business in case the worst should happen. We supply a range of three different types of sand bags; polypropylene, jute hessian and rot-proof jute hessian, all of which are also popular for weighing down road signs, tarpaulins and for packing and despatching of goods.

Each bag has a tie string attached at the mouth of the bag and comes unfilled. Once filled with sand each bag can comfortably hold 15kg, it is recommended not to overfill your sand bag, usually filling half to two-thirds is sufficient in order to mould the bag to a doorway or stack on top of other sand bags. The use of a Tarpaflex tarpaulin is suggested to waterproof and seal your sand bag barrier. Simply lay a tarpaulin on the ground before building your barrier and then wrap the cover around the sandbags and over the top, with further sand bags weighing down the sheet. Although this method does not guarantee a water tight seal it can further assist with flood prevention.

Polypropylene and standard jute hessian is suggested for short term use with jute being fully biodegradable as it's a natural plant product. For longer term requirements rot-proof hessian is recommended. Please enquire for ready to use pallets of filled sand bags.

Rolls of Jute Hessian, Canvas and Polyethylene

Ref	Product	Size	Colour	Pack Qty
HESS	Jute hessian roll	137cm x 46m	Light brown	1 roll
ROLL	PE Roll Goods 110gsm	183cm x 100m	Blue	1 roll
NATROLL	PE Roll Goods 200gsm	183cm x 100m	White	1 roll
CANROLL	Proofed Canvas 18oz	183cm x 25m	Tan	1 roll
CANROLL2	Proofed Canvas 21oz	183cm x 25m	Green	1 roll
CANROLL3	Unproofed Canvas 10oz	183cm x 25m	Natural/off white	1 roll

Hessian

We are pleased to introduce rolls of hessian to our product range. Hessian is a term given to a woven fabric made from jute, it is a natural vegetable fibre which is coarse and durable. Importantly jute is environmentally friendly as it is biodegradable and recyclable and its production has a very low reliance on pesticides and fertilisers.

Jute has a high tensile strength and is a breathable material. As a result, rolls of jute hessian are popular as a frost protection cover over mortar and brickwork during the winter months, it is also popular for use with lime mortar, where protection against the elements is necessary to allow carbonation to take place. In the summer jute is wetted to prevent rapid moisture loss from cement or concrete when it is setting. Rolls of jute are not only used in the construction industry but widely applied in horticulture as a wrap for trees and shrubs. Other applications include arts and crafts, decorative purposes and erosion control in landscaping.

Our rolls of jute hessian are an open weaved product that comes on a roll with a width of 137cm and a 46 metres length.

Canvas Rolls

To complement our range of made up cotton tarpaulins we also have the base fabric supplied on a roll in both wax proofed and unproofed versions. Cotton duck canvas is a breathable, heavy weight plain weave material renowned for its sturdiness. The roll goods are designed for bespoke tarpaulin manufacturers, fabricators of tents, yurts, bags, backpacks, stage backdrops, boat covers and much more.

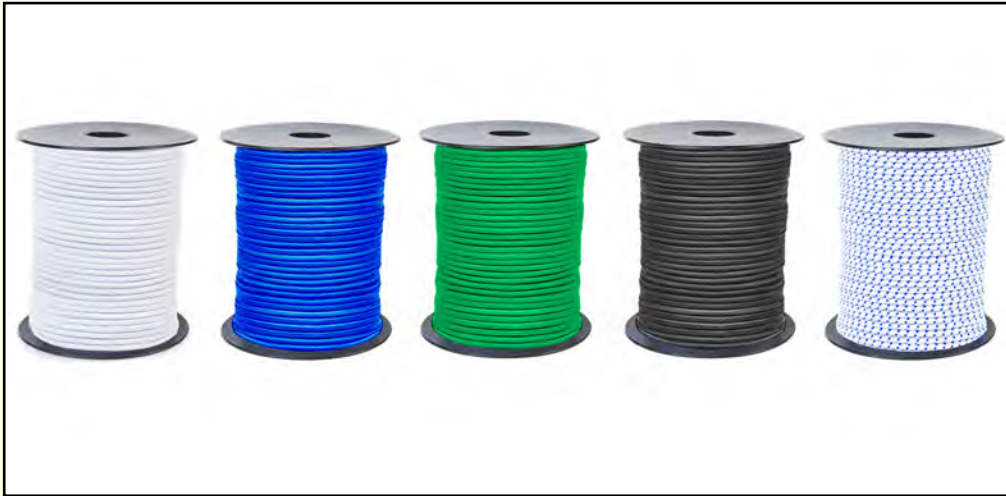

The proofed canvas is water-resistant, which is available in 18oz tan and 21oz green. The unproofed natural state fabric is available in 10oz and is ideal for upholstery, fabricating into curtains or use as a dust sheet.

Polyethylene Roll Goods

Widely used by tarpaulin fabricators our polyethylene (PE) roll goods do not have hems or eyelets so they give the end user the flexibility to be creative. Supplied on a solid cardboard core, our rolls are 1.8m wide with a length of 100 metres. Popular as packaging material and container liners they are also fantastic as a slip and slide! Available in 110gsm blue and 200gsm white UV stabilised material.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

Shock cords

Polypropylene Shock Cord Reels are a recent addition to the Tarpaflex range of accessories. Available in multiple colours, lengths and diameters, the elasticated shock cord reels can be cut to specific lengths for your convenience, and are supple and easy to use. The shape of the Shock Cord also offers excellent resistance to abrasion, providing a flexible yet durable fixing for your tarpaulin. The central core of the cord is composed of rubber while the outer braiding is a high tenacity polypropylene, with added UV protection.

Shock cord, also known as bungee cord, provides a quicker and easier way to secure and unfasten tarps, and in absorbing sudden shock upon the tarpaulin, it's much kinder on eyelets than a rigid product like poly rope.

Shock cord ties

The elasticated shock cord is most commonly used for fixing scaffolding sheeting to scaffolding. Can also be used on tarpaulins to help tie them down. The total length of each shock cord is approx 30cm and can stretch to a total of approx 40cms. Available in a 25 pack or 100 pack. Please note, on standard 12mm size eyelets, shock cords may not fit through the eyelet.

Bungees

Ball bungees are a popular tie down to help keep your tarpaulin in a fixed position. Feed the elasticated loop through an eyelet so the ball part fits snugly against the eyelet, then use the loop to attach to a fixed point. The ball and loop is approximately 20cms long but will increase to approximately 40cms when fully stretched. Available in a 10 pack, 30 pack or loose in larger boxed quantities of 1000 pcs. Available in black 20 cms or white 30cms.

Shelters & Canopies

Small Storage Shelter Peak Roof

Medium Storage Shelter Dome Roof

Medium Storage Shelter Peak Roof

Pop Up Canopy

Ref	Product	Size Ft	Pack Q'ty	Colours
SHELT1	Small Storage Shelter Peak Roof	7' X 12'	1 Carton	Grey
SHELT2	Medium Storage Shelter Peak Roof	10' X 20'	1 Carton	White
SHELT3	Medium Storage Shelter Dome Roof	10' X 20'	2 Cartons	Grey
SHELT4	Large Storage Shelter Peak Roof	12' X 20'	2 Cartons	Tan/White
SHELT5	Pop Up Canopy	10' X 10'	1 Carton	White

Tips & Advice : All shelters, except 12'x20' tan/white are made with flame resistant fabric that meets California CPAI-84 Section 6 specifications. Keep all flame sources away as the fabric will burn if left in continuous contact with any flame source.

Large Storage Shelter Peak Roof

Small Storage Shelter Peak Roof

The 7' x 12' Storage Shelter is an ideal size for discreet storage of garden machinery, outdoor equipment, logs and vehicles as a movable carport. The sturdy polyethylene cover is waterproof with a dark grey outer and white inner, to enhance light internally.

With powder-coated steel poles forming the framework of the shelter, step-by-step assembly instructions are also included.

Medium Storage Shelter Peak Roof

The 10' x 20' Storage Shelter is a medium-sized white shelter with a peaked roof. The side and back panels also incorporate PVC windows for maximum light penetration. Both ends are zippered to allow easy through-access, making this a great shelter in which to house your vehicle.

8 powder-coated steel poles (2" diameter) form the sturdy frame of this shelter, and step-by-step assembly instructions are also included.

Medium Storage Shelter Dome Roof

The 10' x 20' Dome Roof Storage Shelter is a medium-sized grey shelter, with white interior to maximise light and internal visibility. The domed shape of this shelter makes for effective drainage so rain/debris will not pool on top.

Large Storage Shelter Peak Roof

The 12' x 20' Storage Shelter is a large tan shelter with peaked roof. PVC windows are incorporated into the side panels to allow maximum light penetration.

Pop Up Canopy

The 10' x 10' Pop Up Canopy is available in white. Easily erected in 10 minutes, this canopy is perfect for parties, picnics, market stalls and many more outdoor applications.

This canopy comes complete with all fittings as standard including flame retardant polyester top cover, twist-button height adjusters, guy ropes, and ground stakes.

All images are for indicative purposes only and we cannot guarantee continuity of colour or shades of colour. We cannot offer any guarantee to life expectancy of our products. Please see our website for more details.

SSHKQ	Shade Sail Hardware Kit - Quadrilateral			
SSHKT	Shade Sail Hardware Kit - Triangle			

Tips & Advice : Shade Sail Nets are easy to clean and maintain with just soap, water and a hose!

Shade nets are great for turning any outside area into a sheltered haven from the harmful effects of the sun. Made from UV protected woven polyethylene, these attractive nets come in 2 grades which block out between 85%-95% of harmful UV rays but still allows breeze and some moisture to pass through. Packed in a PVC bag with a carry handle each shade net comes complete with lengths of rope. The material is rot proof and mould proof.

Available in a triangular or quadrilateral option, each shade sail net has curved edges which adds to its aesthetic appeal. Sturdy d-rings are double stitched with webbing to each corner, which aids the installation of the net to trees, fences and posts with bungee cord or rope. A special hardware pack complete with stainless steel fixings, such as turnbuckles, snap hooks and pad eyes is available, please see our Accessories on page 29.

Beige, green, yellow, sand or terracotta colour options add a dash of colour to your outdoor setting, especially garden parties, BBQs and children's play areas.

Shade nets are attractively packed in colourful descriptive packing which make them ideal for re-sale in any retail environment.

Accessories

Snap 'n' tap eyelets

Additional eyelets are always recommended to supplement the eyelets already available on a tarpaulin. The Snap 'n' tap eyelets are 12mm in diameter with a male and female part. Simply pierce a hole in the material, mate the 2 parts of the eyelet together and snap together. Then use an implement like a mallet to bond the 2 parts of the eyelet tightly. Can be used on a wide variety of materials. Not recommended for use with the mono cover.
Available in 10 or 50 packs.

Brass eyelet kit

Similar to the snap 'n' tap eyelets, the brass eyelet kits are commonly used to replace worn or broken eyelets and can also be used to customise your own tarpaulin. Complete with an installation tool.

The brass eyelets are available in a 30 pack.

Sun Shade Hardware Pack

All you need to secure your SunShade Sail.

Available for both the Triangular SunShade Sail (6 pcs) and the Quadrilateral SunShade Sail (8 pcs).

Anchors and Stakes

Anchors and Stakes are designed for use with our line of shelters and pop up canopy. We recommend using one anchor for each leg. The anchors and stakes can also be utilised to secure a groundsheet.

Available in packs of 6.

Tarpaulin repair tape

Tarp Tape has been specifically designed to adhere to PE tarpaulins and hold fast to them in outdoor conditions. Widely used to repair rips and tears on tarps, join tarps together or reinforce weak spots, tarp tape is tough and hardy.

Available in Blue, Clear, Green or White in the standard 2" x 35' size or in White or Black on the 3" x 108' size.

Tarp Grabber

Tarp grabbers are a versatile alternative to eyelets. Made from a strong recycled material they are up to 4 times stronger than brass eyelets. Easily installed they can help repair old tarpaulins in seconds and can be used with canvas or polyethylene tarpaulins.

Available in a 4 or 12 pack.

Sand bags

Our polypropylene sand bags are traditionally used to help prevent flooding. They can also be used to weight items down including tarpaulins. Each sandbag is complete with string attached to seal the open end. Sand bags are supplied empty, sand is not included.

Sand bag size is 80cm x 33cm and come in a 10 pack or larger quantities available loose.

Cable ties

Our black plastic cable ties are strong plastic ties widely used in the home or garden. Recommended to use on our debris netting they can also be used for fixing tarpaulins.

Each cable tie is 28cm long and is available in a pack of 100 ties.

Tarp Zip

Our Tarp Zip has an adhesive-backed zipper which is perfect for creating a simple, resealable access doorway. It installs in minutes without special tools and will permanently bond to any clean plastic sheeting (vinyl or poly). It lets you control air movement for temperature maintenance but, more importantly, it keeps dust from migrating throughout the house.

The 84" long, heavy-duty, water proof #5 zipper is sewn to a 950-denier high-density polyethylene backing that has a permanent high-tack acrylic adhesive. Equally useful for providing access to cold frames, shrink-wrapped boats, plastic tent structures and ice shacks.

Accessories

Our range of mini ratchets and cam buckle are all made from durable British manufactured polyester webbing. The webbing is also disperse dyed meaning that the colouring won't rub onto your vehicle, boat or trailer when securing your cargo. The ratchet handles are made from pressed steel which is then yellow zinc plated. The cam buckles are cast metal. All of our ratchet straps conform fully to British Standard EN12195 . All mini ratchets are suitable for light industrial and home use, not to be used for lifting purposes. Other accessories on this page include market stall clips, pegs, stakes and shelter spares

Claw Hook Ratchet

Zinc plated metal claw hook. Size 25mm x 4m. Load capacity 400kg, min breaking load 800kg.

S hook ratchet

With black PVC coated hook at the end. Size 25mm x 4m. Load capacity 400kg, min breaking load 800kg.

Endless ratchet

Supplied with no end attachment. Size 25mm x 4m. Load capacity 400kg, min breaking load 800kg.

Cam buckle

Feed the webbing through the buckle, it has the benefit over a ratchet that it's difficult to over-tension. Has a breaking strain of 350kg and load capacity of 175kg. Size 25mm x 4m

Market Stall Clips

Our market stall clips are made from galvanised steel, these clips are rust-resistant, and each clip features an integrated heavy duty coil spring for strong and secure fixing. Ribbed handles make for added grip. Our clips open to 2 inches wide and are approx 15cm/ 6inches in length.

Stake

Great for use with our shelters or as a heavy duty peg our 12" heavy duty metal stake with white rust-resistant coating and ribbing for a firmer hold, will also fit through our standard 12mm eyelets.

Pegs

Pack of 4 galvanized steel tent pegs, 175mm long. Widely used in camping or on groundsheets.

Shelter spares

A selection of spares are available for our entire shelter range. The spares include replacement covers, poles, foot pads, connectors, cables and clamps.

Frequently Asked Questions

Can you manufacture made to measure covers?

If your requirement is on a large scale we can order particular sizes from our factories in the Far East, however we work on a minimum 4 month lead time. Minimum quantities also apply, please contact us for details. For immediate requirements we can supply you with UK companies who specialise in bespoke covers, we can pass on these companies details upon request.

Why is there a seam on my cover?

Most tarpaulins need a seam as it is impossible to fabricate a tarpaulin without heat sealing several pieces of polyethylene together. A seam may not be necessary on some of the smaller sizes as they can be fabricated from one piece of material. This also applies to dust sheets where a seam is stitched.

Do you offer a guarantee to the lifespan of your Products?

No, although a limited UV warranty is offered on 250,270,350 and 560gsm tarpaulins ranging from 1 to 2 years, on these items please refer to individual product pages, our general information page and our website for further details. As all our tarpaulins will be subject to varying weather conditions and put to so many uses, we cannot guarantee the length of time they will last (except for the aforementioned UV warranty on certain products). Generally speaking a heavier grade tarpaulin is more likely to last longer than our economy grade tarps which we recommend for temporary uses. To maximise the lifespan of your tarpaulin we suggest to securely fasten your cover. Eyelets can come under a lot of pressure and stress points are recommended to be reinforced, fixing additional eyelets can help spread the load. Please avoid any sharp edges and constant friction which can reduce the lifespan of your cover. Shelters and canopies come with a limited 1 year warranty, please see our website for further details.

What size are the eyelets/eyeholes and are they on all 4 sides of the tarpaulin?

The standard inside eyelet diameter on our tarpaulins are approximately 12mm, on the black/silver Super Tarpaflex Plus and PVC covers it is currently 20mm.

Eyelets are on all 4 corners and spaced all around the hemmed edges. Tarpaulins with riveted corner patches please expect the inside diameter to be approx 8mm.

Knitted eyeholes on the debris netting are approximately 20mm wide when stretched. The outline eyeholes on scaffold sheeting are approx' 15mm diameter.

How long until I receive my order?

Please see delivery information on the 'General Information' page for full details. In summary, standard orders are up to 3-5 working days from date of order. Next working day service is available for a surcharge, our cut off time is 4pm for parcel despatch and 2pm for pallet despatch.

Can you send me a sample swatch?

Yes. Please use the contact form on our website or call us and we will be more than happy to send you the sample swatches you require. If you have any doubts over what product to go for, it is recommended to check out the material you feel would be most suitable for your particular requirements.

What is your returns policy?

Genuinely faulty goods will be replaced or money refunded, however we must be advised of any faulty goods upon receipt of the item & no later than 14 days after delivery. An image of the fault is requested.

All our products are guaranteed to be free of any defect at the time of purchase. If any item is found to be faulty we will refund or replace the product without charge. Any tarpaulin which is deemed to have missing or faulty eyelets will be limited to replacement eyelets only.

In the unlikely event that you are not satisfied with any goods purchased or have changed your mind about the purchase, please inform us in writing (fax or e-mail is ok) within 14 days of receipt of the goods to arrange for their return. Return shipping is at the customer's expense however we can arrange a collection at a charge. The product must be in an un-used condition, once the item has arrived back to us, you will receive a full refund minus original shipping costs.

Please ensure that your name, contact details and reason for return is sent on a covering note with the goods. The goods must be sent, wherever possible, in the original packaging. You should ensure there is sufficient outer packaging of the product to guarantee safe and secure transit of the goods back to us, as the returned product must be new and in resaleable condition.

For trade customers wishing to return goods a re-stocking fee will apply.
